Dear Sir:

Applicant encloses a copy of U.S. Patent 5,309,892 to Lawlor. The patent includes a blower deck with an aperture means in proximity to the aperture for either mounting the blower to the downward side of the blower deck for an up flow furnace configuration or mounting the blower to the upward side of the blower deck for a down flow furnace configuration. The disclosures of this patent are not considered particularly relative to the claimed invention, and are submitted solely to comply with the applicant's duty of disclosure.

Respectfully Submitted,

William O'Driscoll
